

# **BUREAU OF PRISONS: PROVIDE BOTTLED WATER TO PRISONERS AT MARION NOW!**

Prisoners at Marion Federal Penitentiary get their water supply from Crab Orchard Lake, a toxic waste dump site, which contains a significant amount of PCB, lead, chloroform and arsenic contamination. In addition, the EPA has placed the entire refuge containing Crab Orchard Lake on its Superfund Priority Clean-Up List. But still the prisoners are forced to shower, drink and eat food prepared with this water. They have a high incidence of rashes, dizziness and other problems consistent with symptoms of PCB exposure. This is but another of the atrocious conditions to which the prisoners at Marion are subjected.

**PRISONERS NEED CLEAN WATER!  
END THE MARION LOCKDOWN!**
